FAST. EASY.
CUSTOMER FOCUSED.®

More than a slogan, it's plain and simply the ROCKFON way of meeting customer needs world-wide. Since 1893, our valued customers have depended on our suspension grid, metal ceiling and ceiling panel systems to bring their creative projects to life. The ceiling projects featured in this catalog are, in many cases, the award-winning and painstaking results of our customers endeavors to meet their client's needs. We invite you to take a look inside, as we hope you will be equally inspired.

GRID	METAL

GRID SUSPENSION SYSTEMS

HIGH RECYCLED
CONTENT... **HRCmax**
FOR GENERATIONS
TO COME

The demand for green building designs are on the rise, it is therefore critical that your projects utilize products that incorporate the use of high recycled content material.

ROCKFON is committed to providing industry-leading HRC products, in all ceiling categories. Our HRCmax™ ceiling grid system includes 81% recycled steel in a variety of distinct profiles.

SEISMIC SOLUTIONS –
INTEGRAL COMPONENTS OF A
BETTER BUILT ENVIRONMENT.

Though suspended ceilings are considered non-structural, recommendations for seismic stabilization do exist, and ROCKFON has developed ICC recognized systems that can save up to 75% in material and labor costs.

Chicago Metallic’s Seismic Grid Systems are a cost-effective solution that includes seismic and fire-rated seismic constructions to satisfy all seismic code requirements while permitting direct upward access to mechanical systems.

METAL CEILING SYSTEMS

METAL CEILINGS –
FROM THE SIMPLE
TO THE SUBLIME!

ROCKFON's preeminent position in the metal ceilings market is unparalleled. ROCKFON's broad array of curving, linear, flat metal, perimeter treatment and open plenum designs give the designer the tools to create projects that span from the simple to the sublime. Architects and designers have also trusted in ROCKFON's ability to produce metal ceiling products that are aesthetically pleasing, installer friendly and compliant with the most stringent standards for safety and durability. ROCKFON's expansion of metal ceiling product lines to include more planks, downward accessible systems, decorative wire mesh and resin panel systems, offer the design community even more choices to meet stringent budgets.

COLORS AND FINISHES – A BROAD PALETTE FOR INTERIOR AND EXTERIOR BEAUTY

No matter the effect you seek for your ceiling design, ROCKFON is uniquely capable of bringing it to life. We recognize the value of offering contrasting colors or the visual impact of uniformity in color from one ceiling component to another; our colors and laminates will do this and more. With our broad range of painted and metallic colors, laminates, and wood grain finishes, your design is in good hands.

ACOUSTICAL CORRECTION – BETTER ENVIRONMENTS FOR LIVING, LEARNING AND LISTENING

Schools, offices, retail projects, galleries and waiting rooms must all consider acoustical performance if they are to meet the well-being of the occupants. The fact is that managing acoustics in any built environment is essential to maximizing comfort, interpersonal communication or performance productivity. Today's ceilings, through science can with optional features, help your project to support speech intelligibility or quell the clamor of a night time crowd.

OPEN PLENUM DESIGNS – A MINIMALISTS DREAM COME TRUE

Rockfon Open Plenum ceiling designs elevate the philosophy of “less is more” to an entirely new plane. Plenum masking, wire mesh panels in stainless or carbon steel and 360 degree painted suspension systems add life to ceiling spaces. Available in a wide array of configurations, Open Plenum systems are a minimalists dream!
