## ROCKFON LINEAR METAL CEILINGS

Rockfon® Linear Metal Ceilings provide ceilings with continuous linear lines in a variety of styles and painted, wood-look or metal finishes. The spaces between the panels may be left open for acoustical or air movement requirements, or closed. Panels also may be perforated for increased acoustical performance. Our linear designs have been used extensively on exterior and interior applications and give designers several options for creating visual design continuity which can flow from inside a space to outside the building.

#### Sound Ratings

Solid panels, open reveals, 1.5" x 1.5 # acoustical blanket = NRC 0.60

Perforated panels, open reveals, 1.5" x 1.5 # acoustical blanket = NRC 0.95

Perforated panels, open reveals, with Acoutex™ backer material = NRC 0.55

Perforated panels, closed reveals, 1.5" x 1.5 # acoustical blanket = NRC 0.95

Perforated panels, closed reveals, with Acoutex™ backer material = NRC 0.70

#### Popular Applications

Ideal for airports, transit, galleries, offices, restaurants, corridors, auditoriums.

#### Features

- Choice of widths, round and square edges, shallow and deep profiles.
- Thickness and finishes for virtually any environment.
- Reveals between panels can be closed or left open.
- Easily incorporates lighting, air, audio and services.
- Visual design continuity from exterior to interior.
- Enhance acoustical performance with optional backing.
- Metal contains no organic compounds to support mold and microbial growth
- Perforated for acoustical performance or solid, for a unique look.
